

Build your future

Digital Service Innovation Consultant (f/m/d)

We are a company where brilliant people embrace change and seize opportunities to advance their careers and increase the success of our clients. DXC is always looking for enthusiastic and motivated new talents are ready to launch their career into the world of leading-edge technology. Our Early Careers Program combines an immersive training curriculum with our own DXC Academy with learning on the job to enhance the skills you need to be successful on your career path.

As a **Junior Innovation Consultant (f/m/d)** in the Digital Service Innovation Team, you get the possibility to support the digital transformation with our customers with innovative approaches, topics and methodologies. Using our expertise plus the power of all DXC and our Partner and Startup ecosystem, we make it possible to deliver value fast and agile.

What can you expect?

As a **Junior Innovation Consultant (f/m/d)** you get the chance to choose to work independently in your defined area (**Partner Management Focus, Business Focus, Technical Focus**) to push innovation into our organization and beyond.

What's in it for you?

- A 12-week training on and off the job program
- Gain an up-to-date & cross-industry overview of the market and creative ideas on "what & how" to position towards a customer to solve their specific challenges
- Deep dive into Design Thinking, the Lean Startup Approach, Rapid Prototyping and more of our methodology toolset
- Understand and manage complex partner ecosystem and identify synergies to DXC Offerings
- Actively shape and directly influence DXC's own innovation capabilities & programs

What are we looking for?

- Motivated and highly enthusiastic candidates with a university degree in business informatics, computer science or comparable training
- Passion for learning more about relevant technologies, innovations, business models and industry trends
- Experience in working with agile methodologies would be a benefit
- Strong analytical, communication and presentation skills
- Fluency in German and English

What else do we offer?

- Flexible working time models
- An attractive salary package
- Extensive training and learning opportunities
- Opportunity to work with cutting-edge technologies and products in state-of-the-art enterprise environments
- Demanding and varied customer projects
- Opportunities for rapid advancement and challenging activities with a high degree of freedom and responsibility
