Cross Dataspace Governance and Security

June 2nd 2026

Arno Weiß (SAP SE)

Decentralized Trust: “WHO says WHAT about WHOM?”

```
{
  "@context": [
    "https://www.w3.org/2018/credentials/v1",
    "https://w3id.org/catenax/credentials/v1.0.0"
  ],
  "id": "1f36af58-0fc0-4b24-9b1c-e37d59668089",
  "type": [
    "VerifiableCredential",
    "MembershipCredential"
  ],
  "issuer": "did:web:com.example.issuer",
  "issuanceDate": "2021-06-16T18:56:59Z",
  "expirationDate": "2022-06-16T18:56:59Z",
  "credentialSubject": {
    "id": "did:web:com.example.participant",
    "holderIdentifier": "BPNL000000001"
  }
}
```

WHO

WHOM

WHAT

“Well now... WHOM do I trust FOR WHAT?”

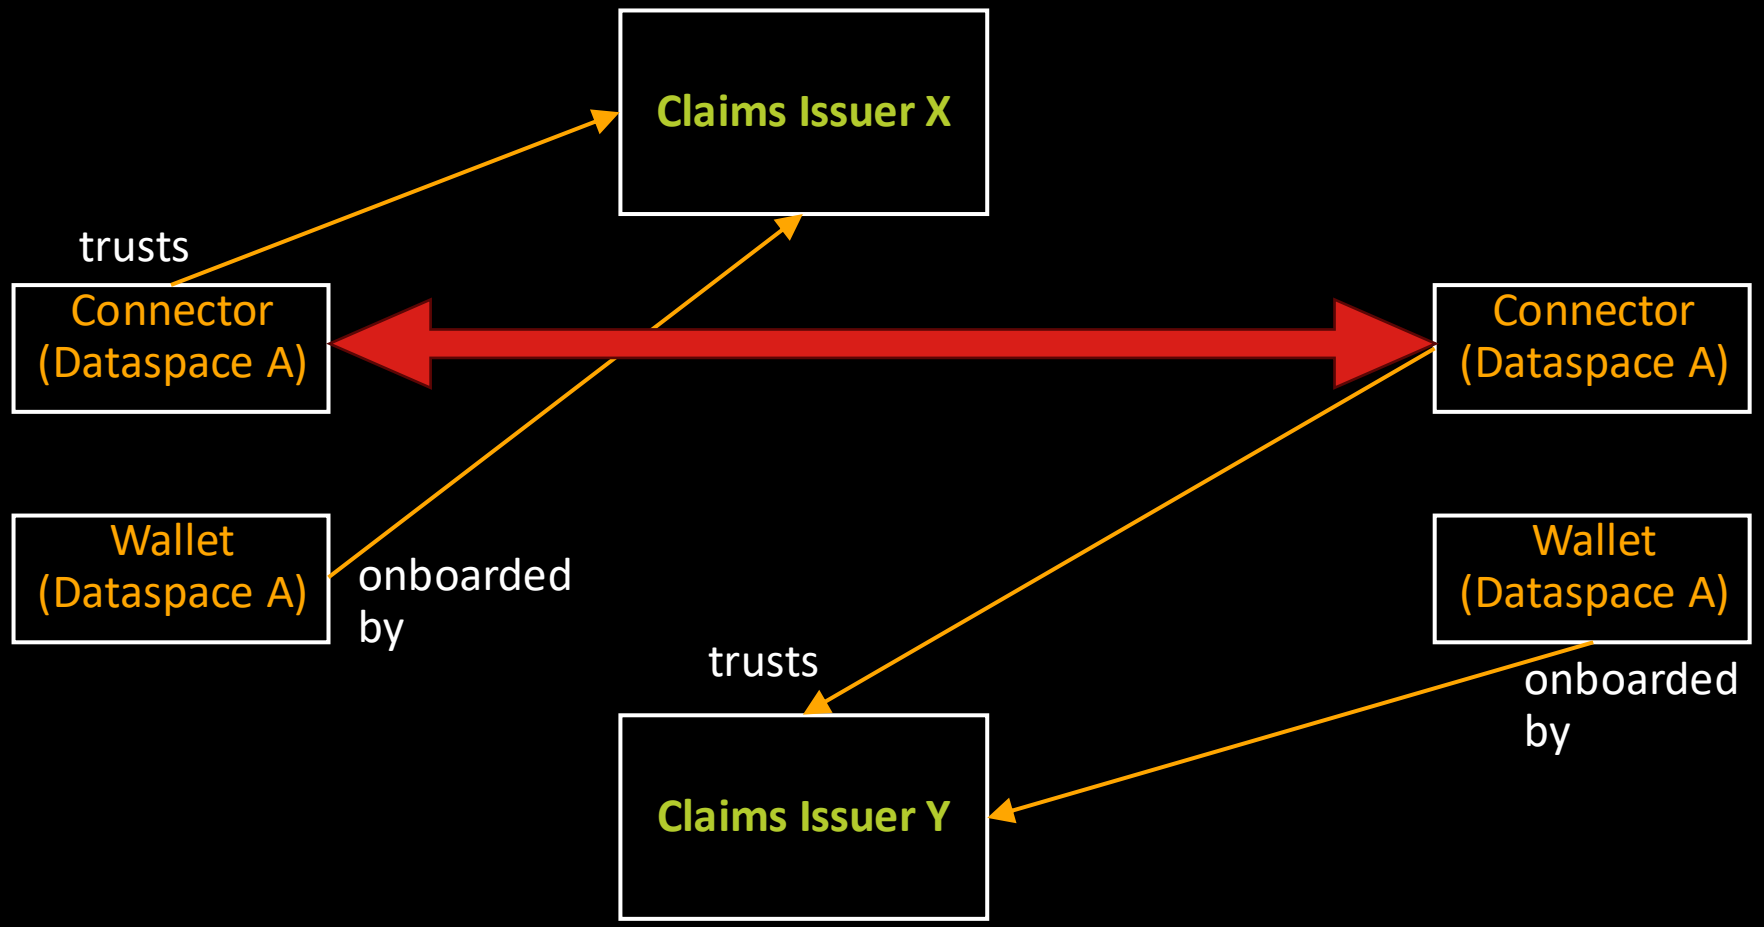
```
51      dcp:
52        # -- Configures the trusted issuers for this runtime.
53        trustedIssuers: []
54        # - id: "did:web:example1.com"    WHOM
55        #   supportedTypes:
56        #     - "MembershipCredential"    WHAT
57        # - "did:web:example2.com"
```

Even Standards compliance isn’t enough (luckily).

Dataspaces can all follow the same specs and never interoperate.

Spotlight 1:

Trust Config



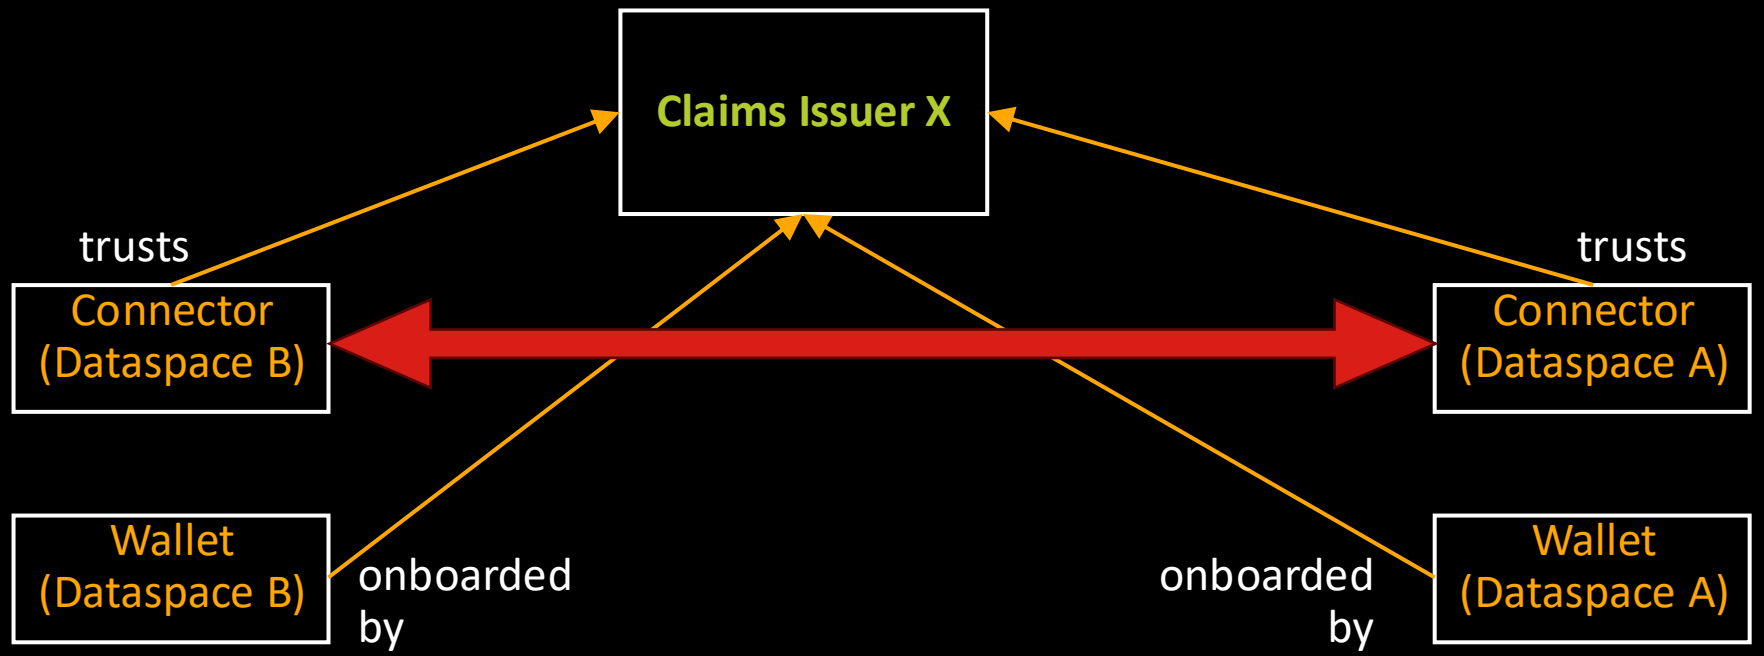
© 2023 Catena-X or a Catena-X affiliate company (Version 3.0 OG)

Trust Config isn’t enough.

If there’s no shared understanding of terms and identities, trust will never establish.

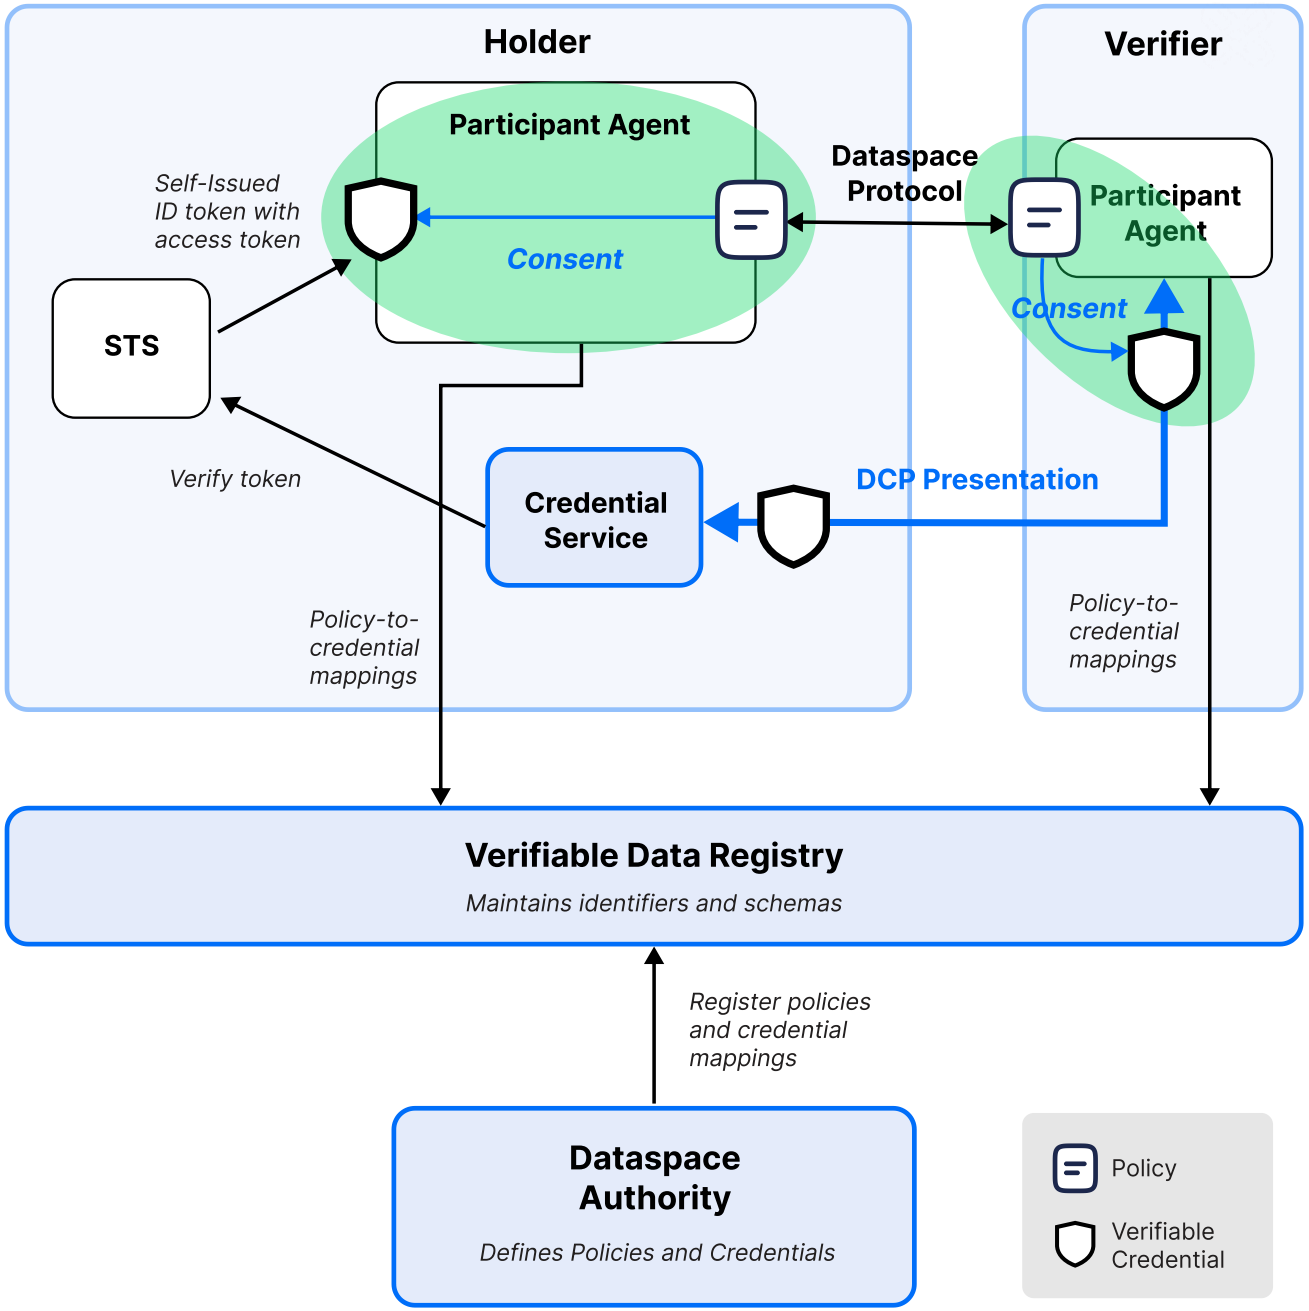
Spotlight 2:

Dataspace Profiles
(note Dataspace B)



© 2023 Catena-X or a Catena-X affiliate company (Version 3.0 OG)

The Dataspace Authority governs these problems away.



Thanks – visit our (ongoing) workshop!
